Accelerating IT Transformation
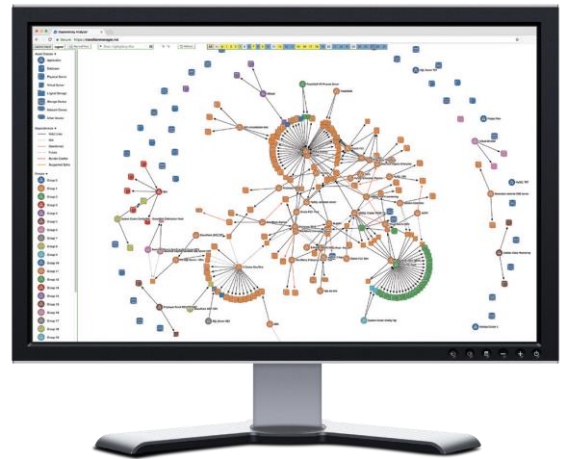

COMPANY OVERVIEW

Accelerate Your IT Transformation

TDS works across industries to help enterprise class companies, global organizations and government entities embrace and maximize the power of Hybrid IT by accelerating their migration to cloud, platform, application and data center environments while reducing project risks and lowering overall costs.

TDS empowers, enables and accelerates an IT organization's ability to prepare for, orchestrate and manage through both planned and unplanned change. TDS is recognized by industry analysts, chosen by Fortune 500 companies and standardized by some of the largest technology services firms.

Since 2002, TDS has been successfully delivering results for complex IT transformation programs for enterprises and government entities around the world, having migrated over 1 million workloads and more than 250,000 applications while achieving close to 100% customer satisfaction.

Today TDS' TransitionManager software has become the standard for accelerating the orchestration and execution of complex hybrid cloud and data center migrations, disaster recovery and operational resiliency initiatives and application rationalization programs.

The Power of TransitionManager

TransitionManager is a SaaS-based collaboration platform that empowers IT to accelerate their digital transformation initiatives, rapidly adopt new technology, and build resilience across complex, hybrid environments. It captures TDS' powerful approach to planning, orchestrating and executing IT transformation projects and enables IT leaders and their teams to successfully complete end-to-end migration and IT transformation projects faster, more efficiently, and virtually risk free, in even the most complex operating environment.
