

Top Post-Merger IT Integration Challenges

20%

cite IT as one of the most challenging areas with post M&A*

Primary Technical Challenges Organizations Face Following M&A:**

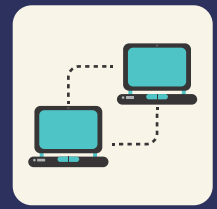

Lack of
Visibility

Compliance
Regulation

Inadequate
IT integration

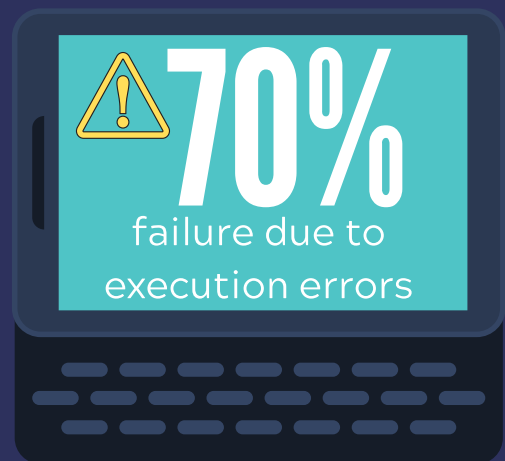

Data
Amalgamation

80% of M&As fail to enhance shareholder value and achieve the anticipated synergies...

...and in 70% of these cases failure is due to execution errors.***

75%

of an integration effort during M&A is determining:

- Which systems to keep
- What data is important
- How much integration is actually needed before the companies are technically joined.†

Four IT Must-Haves for a Successful M&A

1. Understand your environment
2. Access all your data in one place
3. Break through the chaos and build a better culture
4. Hit the ground running
